A man with curly hair, wearing a dark jacket, stands behind a dark wooden podium on a stage. He is holding a microphone and appears to be speaking. Behind him is a large projection screen displaying the text 'decentral.community' in white. The stage is flanked by metal truss structures, and the background is lit with warm, orange and red lights. The overall atmosphere is professional and modern.

Home-baked collateralized loans

- When crypto is low, you need to pay suppliers, but you don't want to sell cryptos
 - Use crypto as a collateral, borrow money
 - Low-risk for both sides, although we should really "refeed" collateral when crypto goes down
 - Capacity is limited (or interest rate goes too high)
- Also note that we are non-profit, so bank is not an option (and we are crypto positive, so not an option at all)
